

Press Release

April 1st 2021

A-BANK Co., Ltd.

3-4-33, Minato-ku, Maruman Roppongi Building 3F

Roppongi Business Center G, Tokyo, Japan

"A-BANK No-code development service [A-CODERS] is organized into development teams mainly for students and international students enrolled in the field of advanced science and technology. Started providing the fastest no-code and low-code high-speed development services in Japan with various team formations. "

A-BANK Corporation (Maruman Roppongi Building 3F, 3-4-33 Roppongi, Minato-ku, Tokyo, President: Naohisa Shoji, hereinafter referred to as "A-BANK") has created A-CODERS, a development service specializing in no-code development, with its members

consisting of students and international students studying advanced science and technology fields in Japan. We provide services to our clients at high speed by using the low-code development environment without any language barrier. (*Please visit our website at <https://automatist-bank.ai> and click on A-CODERS on the upper right)

By making A-CODERS a predominantly foreign student organization in the field of advanced science and technology, we will provide the following benefits to our clients

(1) By deploying advanced science and technology talents with excellent programming skills in the no-code and low-code fields, we can provide our clients, from startups to enterprise-level companies, with high-quality, extremely high-speed development services that are the best in Japan.

(2) High speed development leads to a reduction in the number of development man-hours, and thus a reduction in development costs

for our clients.

(3) In the no-code and low-code development environment, where English is the dominant language, there is no language barrier, so we can respond more quickly to our clients' needs, including access to the latest features.

(4) Development areas that are not supported by no-code or low-code are quickly compensated for with advanced programming capabilities, and higher quality output is delivered at high speed.

We have already enrolled students and international students majoring in quantum computing, data science, robotics, advanced materials development, etc. We have confirmed that these students can learn the no-code and low-code development environment on their own without any training. We are also committed to teaching the importance of teamwork and achieving goals in an international environment with diverse nationalities and ethnicities, while respecting the spirit of mutual aid.

We will also actively support students and foreign students registered with A-CODERS to work for Japanese companies as global advanced DX human resources.
