A-BANK Corporation

Maruman Roppongi Building 3F, 3-4-33,Roppongi Business Center G, Minato-ku, Tokyo, Japan

"A-BANK Started new service development support [A-STUDIO] using high-speed no-code development service [A-CODERS]. Realizes speedy market launch of new applications, SaaS/MaaS through high-speed MVP (Minimum Value Product) development with no-code."

(Please visit <https://automatist-bank.ai> A-STUDIO)

A-BANK Corporation (hereinafter referred to as "A-BANK") will launch "A-STUDIO" with the aim of creating new applications, services, and startups by utilizing A-CODERS, a no-code high-speed development service operated by A-BANK.

A-CODERS students will develop MVPs using ideas solicited from the public and requests from entrepreneurs, and we will provide business development support. In the future, we are looking to create an investment fund targeting applications, SaaS/MaaS, and other new services brought to **【A-STUDIO】**, as well as startups based on these services.

The feature of [A-STUDIO] is to develop MVPs quickly by utilizing the best no-code tools for the ideas and commercialization proposals that are brought to us, and to quickly conduct feasibility studies at low cost. At A-STUDIO, IT students and international students who are studying in the field of advanced science and technology can participate in a variety of activities.

At A-STUDIO, IT students and international students studying in advanced science and technology fields are engaged in MVP development using various no-code tools. In addition, our company, which has a wealth of experience in domestic

and international venture investment and incubation, will provide evaluation and business development support in cooperation with our partners.

Through **【A-STUDIO】** , we will try to minimize prior investment as much as possible and bring out new services and ventures to the world with less cost and time.

The A-STUDIO is limited to applications and services that operate on the Internet.
